

OceanPrime Sustainable Seafood

powered by  SeaChoice.org

## OceanPrime® Sustainable Seafood Catalogue

**"a Fresh Catch™ Today for Tomorrow's Oceans"**

### What is Sustainable Seafood?

Sustainable seafood is fish or shellfish that is caught or farmed in ways that consider the long-term viability of harvested populations and the ocean's health and ecological integrity. Choosing sustainable seafood is an effective way to support the best practices in the fishing and aquaculture industries to ensure our ocean resources last long into the future.

### Determining Sustainable Seafood

OceanPrime has been working with and collaborating for months with the leading Canadian Sustainable Seafood organization - SeaChoice. SeaChoice is a comprehensive seafood markets program with the primary goal of realizing sustainable fisheries in Canada and abroad. They use the best available science, strategic communications and partnerships to mobilize sustainable seafood markets throughout Canada.

The entire OceanPrime Sustainable Seafood Program and the products considered sustainable have all been identified and assessed by SeaChoice. For more information please visit [www.seachoice.org](http://www.seachoice.org).

**= BEST CHOICE**

This species is currently fished/harvested sustainably and represents a best choice. Enjoy, while supporting responsible fishing and coastal livelihoods.

**= SOME CONCERNS**

Seafood that should be consumed infrequently, or when a green choice is not available. There are conservation concerns with the current populations or practices in this fishery.

## Guiding Principles

OceanPrime  
Sustainable Seafood

OceanPrime recognizes its role in helping ensure a sustainable future for the seafood we buy and sell, and the overall health of our oceans. As one of the largest seafood distributors in Canada, we aim to be a model of sustainability in the Canadian seafood marketplace and to emerge as a proactive leader that is well positioned to supply sustainable seafood products to our consumers.

### **Make a Commitment**

Commit to developing and implementing a comprehensive, corporate policy on sustainable seafood.

### **Collecting Data**

Assess and monitor the environmental sustainability of our seafood products

### **Buying Environmentally Responsible Seafood**

Support environmentally responsible seafood choices through purchasing decisions

### **Be Transparent**

Make information regarding your seafood products publicly available

### **Educate**

Educate our customers, suppliers, employees and other key stakeholders about environmentally responsible seafood.

### **Support Reform**

Engage in and support policy and management reforms that leads to positive environmental outcomes in fisheries and aquaculture management.
